Samsung 720p A Massive Flat Screen, Plasma TV

If you thought that possessing a big, flat screen, plasma TV is only for the rich and famous, then you really should look at the Samsung PN50C490 3D TV. With this amazing television set, you are likely to get all the experiences of going to the cinema without the need of possessing to leave your own residence. You find information on the web regarding electronics such as [Shopping Online](#).

It offers the mega dynamic contrast ratio that is certainly responsible for the rich and vibrant color that is certainly featured on every frame. If you might have been confused which television to pay attention to due to how the industry is now saturated with big TVs, then look no further as a result of the Samsung PN50C490 3D TV will be the only TV you're ever going to will need again.

Aside from possessing large definition resolution along with the biggest and brightest screen ever to hit the industry, the Samsung PN50C490 3D TV is also a TV that is certainly gentle around the setting. But before we delve into the amazing ecologically friendly aspect of this TV, you really should know that it is also jam-packed with offers.

The advantages which you get whenever you use the Samsung PN50C490 3D TV are two-fold: you use significantly less power so you support the setting as well as save money. If more and more TVs were to make use of significantly less power in the world, then the earth would be under significantly significantly less stress than it truly is in now with all the amount of power that is certainly consumed every single day.

Also, you get to save a lot more money on electric bills as a result of your Samsung PN50C490 3D TV will use significantly less power thanks to the truth that it meets and even far exceeds the Electricity STAR standards. This means that that is, by far, the most energy-efficient TV recognized to man.

It would be fine to educate you around the advantages of viewing television on a plasma TV as opposed to regular TVs. Plasma televisions are recognized for their premium quality image that is certainly more effective than all the other past models of televisions ever made. With plasma televisions, the image does not degrade or turn into pixelated on a plasma TV. But with all the Samsung PN50C490 3D TV, it truly is still even more effective than the other kinds of Plasma TVs.

These plasma TVs use an array of cells called pixels, and each pixel has three sub-pixels as properly, which then correspond to the three basic colors of television which are red, blue and green. Gas that is certainly in the plasma state is then increasingly being utilised to react with all the phosphors in the sub-pixels to then produce the premium quality image which you see.

This quite same engineering is that which is increasingly being utilised in the new Samsung PN50C490 3D TV, but is even increasingly being taken to a higher level. Samsung wanted to take an engineering that was becoming so well-liked and to create it even more effective. This TV goes to revolutionize television viewing along with how different manufacturers create their products.

Not only are the pictures the highest that high definition could possibly be, but also, the extra factor of increasingly being gentle around the setting is actually going to be a crowd-pleaser. It really is small issues like these when people today are able to assist the setting even though doing some thing pleasurable for example viewing TV that goes to create it big in the industry, and may possibly just open up the opportunity for other products to turn into eco-friendly as well.

Here are the offers in the Samsung PN50C490 3D TV:

1. Super premium quality contrast
2. Anynet (HDI CEC)
3. 3D compatible – this will be the only big screen TV which you will uncover that is certainly basically 3D compatible. Though other television units can show 3D, this TV is basically made especially to become able to handle that.
4. ConnectShare Movie – this implies that there are USB ports that let you connect to digital cameras and flash drives faster than ever before. This also indicates which you can play your movies and shows correct from your

thumb drives and flash drives. Say goodbye to cluttered DVDs all over your house!

5. Plasma flat panel display engineering

6. 50 inch diagonal size

7. 1366x768 native resolution

8. 16:9 native aspect ratio

9. 2000000:1 contrast ratio

10. It also has progressive offers for example the E3 Panel engineering along with the 600Hz Subfield Motion

11. It has surround sound offers without a doubt, so even without the need of a professionally-added system, you without a doubt get the top sound thanks to the TruSurround HD

All of these offers in just one television set may possibly sound too good to be true. But as a matter of truth, it actually goes to come about; and it goes to come about for you for significantly less than a thousand dollars. When the Samsung PN50C490 3D TV finally gets released, it will sell for only \$989. This means you get to have the excellent, style and prestige of a flat screen plasma TV without the need of possessing to break the bank and spend outside of your comfort zone. This is an amazing feat in engineering, along with the buzz is without a doubt spreading around the Internet mainly due to the amazing price. There are great deals also found at sites containing [Audio Electronics](#).

This television set has yet to be released, but it truly is without a doubt generating a lot of buzz in the television-making industry. This is as a result of it truly is believed that the Samsung PN50C490 3D TV may possibly just be the finest thing to hit the industry since 3D very first became out there on televisions in the very first place. If you pre-order it now, you are able to even get it for as low as \$989, as opposed to buying it when it truly is released at \$1,099. This will be the cheapest and ideal model which you will uncover in a long time, and it seems that Samsung is living up to its reputation of increasingly being able to give the top without the need of possessing to break the bank.

And remember, the 3D viewing experience is not complete without the need of the 3D glasses, so make sure you might have the proper glasses ready and waiting for your all-new Samsung PN50C490 3D TV. Along with all the 3D glasses, you are able to also avail within the surround sound systems which are without a doubt increasingly being offered as the ideal companions for these television sets. To make use of this product, you only need to install it directly onto the television port, which is also where the cable need to be.

There are quite effortless installation guides that come along with all the television upon buy, but one within the issues which you need to take into account is to put it in a place where it truly is effortless to access the different ports which you will probably be using, for example the USB port along with the Ethernet port. Other than that, this amazing television is pretty significantly plug and play.
